

# DEVELOPER SURVEY 2019 – STACK OVERFLOW

By: ARVIN PATRIK

Date: 27 – 03 - 2024

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- The goal is to perform data contextualization and analysis
- Methodology description
  - Data gathering
  - Data Analysis
  - Data Visualization
- Results displayed with graphs and trends
- Overall findings and implications regarding the results previously portrayed
- Final conclusions of the research

# INTRODUCTION

---

- Annual Developer survey is the largest survey where people code around the world.
- Nearly 90000 developers.
- The results DO NOT interpret everyone in the developer community.
- The trends and results provide insight on where the developers are going.

# METHODOLOGY

---

- Collect survey data and explore contents
  - Web Scraping
  - APIs
  - Request Library
- Data Wrangling
- Exploratory Data analysis
  - Outliers
  - Analyzing data distribution
  - Correlations
- Data Visualization
- Dashboards

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

### Current Technology Usage

Bar Chart - Top 10 Languages worked with

LanguageWorkedWith

## Next Year

### Future Technology Trend

Bar Chart - Top 10 Languages Desired Next Year

LanguageDesireNextYear

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript is the most used language
- Python appears to be the most improving language
- Great demand in TypeScript

## Implications

- Developers can shift from JavaScript to TypeScript

# DATABASE TRENDS

## Current Year

Column Chart - Top 10 Databases worked with

## Next Year

Column Chart - Top 10 Databases Desired Next Year

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL is the most frequently used database among the top 10
- PostgreSQL and MongoDB displays good improvements
- Lack of interest in Microsoft SQL Server and SQLite

## Implications

- Microsoft SQL Server and SQLite losing pace in the market
- PostgreSQL and MongoDB showing establishment in the market

# DASHBOARD

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript is widely used, and TypeScript is getting on-demand.
- 90% are young developers.
- Developers mostly located in developed countries.

## Implications

- JavaScript and TypeScript web frames gaining followers.
- Global polarization of developer's location and gender.
- Young developers without postgrad studies on its majority

# CONCLUSION

---

- Developers are the group with very marked characteristics.
- Accessibility of this labor market must be made visible to developing countries.
- Popularity of tools, trends and platforms can be made obtained.

# APPENDIX
